

Toward a **Zero Energy Home**

In this workshop, we'll dig deep, learning about the health and efficiency of Lancaster row homes. We'll discuss how row homes are different from other structures, and which improvements are cost-effective ways to save energy. You will leave with a list of steps you can take to prepare your house for renewable energy solutions and energy independence.

Please contact **LIVE Green** to pre-register at 669-5990 or email: info@livegreenlancaster.org.

Learn how to tell if your home and location are right and ready for solar systems

Hear about the typical row home improvements that will save energy, improve comfort, and possibly improve your health

Leave with a step-by-step plan to support you in your row home improvements
